

Winnipeg Construction Association along with the  
Manitoba Construction Sector Council is pleased to present

# BST

---

## BUILDING SUPERVISORS FOR TOMORROW

In response to the data collected and requests of the construction industry, Winnipeg Construction Association along with the Manitoba Construction Sector Council have developed and designed for experienced construction workers moving into or aspiring to a leadership position a Supervisor Training Program. This program and curriculum are based on the research developed by the Construction Sector Council, National Occupational Analysis and the Manitoba Construction LOCAL Advisory Steering Committee. This certificate program will teach various competencies to enhance and educate first time supervisors (or brush up on your skills).

**“Building Supervisors for Tomorrow”** has been designed to prepare first time supervisors on their journey into management. Understanding how busy people are with work and family time, this program has been developed in module size chunks, each module running anywhere from 4 hours to 12 hours depending on the topic. This delivery system is more flexible than any other program currently being offered. It’s affordable and upon completion of 80 module hours a certificate will be earned and awarded.

We will have a schedule ready to pilot beginning January 2010. If you are interested or someone within your company is ready to make the leap, contact WCA offices, Kelly Thiessen at 204-775-8664 x 2225 . **YOU ARE UNDER NO OBLIGATION**. (WCA FAX: 204-783-6446)
